

What is claimed is:

1. An airbag for protecting an occupant, comprising;

a bag portion to be inflated in font of the occupant, and

a pressure sensor mounted on an inner surface of the bag

5 portion for detecting an inner pressure of the bag portion when
the airbag is inflated.

2. An airbag according to claim 1, further comprising a harness
electrically connected to the pressure sensor, said harness

10 being disposed along the inner surface of the bag portion.

3. An airbag according to claim 1, wherein said harness has a
portion extending along a folding line of the airbag for folding
the same.

15

4. An airbag according to claim 1, wherein said pressure sensor
is disposed at a portion of the airbag other than a surface of
the airbag contacting the occupant and a vehicle body when the
airbag is inflated.

20

5. An airbag device comprising the airbag according to claim 1
and a gas generator attached to the airbag for inflating the
same.
